

Title: Desk Review to Identify Potential Data Stakeholders at The University of the West Indies, Cave Hill Campus

Methods:

A desk-based review was conducted to identify potential data stakeholders at the UWI Cave Hill Campus, drawing primarily on annual campus-level publication reports available via the university's official website (<https://www.cavehill.uwi.edu/about/reports.aspx>). Reports from the past five academic years (2020–2021 to 2023–2024) were reviewed. Academic staff were included in the stakeholder list if they had at least one research output in any of the three most recent reports (2021–2022, 2022–2023, and 2023–2024). Once included, their outputs from 2020–2021 were also recorded. Staff were categorized by Faculty, and research outputs were classified annually into four categories: 0, 1, 2, or 3+ publications. Outputs considered included peer-reviewed journal articles, book chapters, edited volumes, and conference proceedings.

To supplement these findings, the Web of Science Clarivate Analytics database was used as a secondary source to ensure comprehensiveness. The Cave Hill Campus holds an institutional subscription to Clarivate, accessible via the UWI library portal ([UWILinc](#)). Eligible research outputs included original research articles, reviews, editorials, letters, books, and book chapters. Searches were conducted using the broader institutional affiliation "University of the West Indies" rather than "University of the West Indies – Cave Hill," to account for possible misclassification of author affiliations. The search was restricted to the past five years. Identified authors were then cross-checked against the Cave Hill staff directory to confirm campus affiliation. Any staff member with at least one eligible publication since 2021 was included in the final list of potential data stakeholders.

UNIVERSITY CENTRES AND INSTITUTES	NAME	NUMBER OF OUTPUTS
